## A comprehensive list for English learners

[Read the Full blog post and watch the video tutorial](#)

With dozens of prompts to choose from, this list will help you get started with ChatGPT! From job interviews to TOEFL sample tests, this list will jumpstart your practice.

### How to use this list:

Knowing where to start with ChatGPT can be overwhelming, so we've made it easier for you!

This list has prompts for all different types of English practice. Simply copy the prompt you want to use and paste it directly in ChatGPT. Of course you're encouraged to use these prompts as inspiration, and change the prompt based on what you're interested in and what you need to work on.

You can adjust the English level of the conversation by requesting ChatGPT to rewrite something at a certain language proficiency level, for example, you can make a request like "can you simplify", "can you rewrite this text for an A2 level", or "rewrite using C2 vocabulary", etc.

**The quality of the responses depends on the quality of your questions. Keep asking the same question in different ways if you're not happy with the response.**

While ChatGPT can help you immensely in many parts of your practice, it has its limitations, and cannot replace speaking practice with humans or the feedback you would receive from an experienced teacher or pronunciation coach.
